

A Christmas gift for your Vehicle, Winter Engine Warm-up

Using a block heater in winter equals comfort, safety, savings and, most of all, environmental friendliness. A 2009 CAA-Quebec study showed that (average temperature of -10°C) a vehicle that is plugged in warmed up 40% faster. Several automakers equip their vehicles with a block heater right on the assembly line, some do not. Don't have one? A block heater can be added to almost any automobile. Why go without one?

Looking for an up-to-date automotive shop? Look no further.

We have all the current diagnostic tools your car needs and our knowledgeable technicians are trained in all the new technologies.
