

# GIVE YOUR CAR SOME LOVE, WITH PREVENTATIVE MAINTENANCE

## What is preventative maintenance?

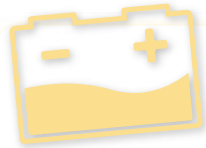

Preventive maintenance is a schedule of planned maintenance actions aimed at stopping breakdowns and failures. The primary goal of preventive maintenance is to prevent the failure of equipment before it happens. It is designed to preserve and enhance equipment reliability by replacing worn parts before they fail. Preventive maintenance includes equipment checks, partial or complete overhauls, oil changes, lubrication and so on. In addition, our technicians can record equipment deterioration so they know to replace or repair worn parts before they cause your vehicle to break down. The ideal preventive maintenance program would stop all breakdowns before they occur. **At Highlift Auto we encourage preventative maintenance.**

## Valentine's Funny!

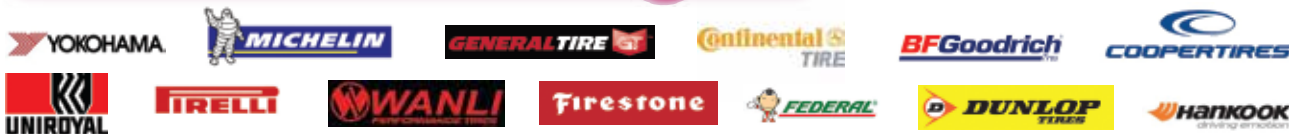

A man bought his wife a beautiful diamond ring for Valentine's Day.

After hearing about this extravagant gift, a friend of his said, "I thought she wanted one of those sporty four-wheel-drive vehicles."

"She did," he replied. "But where was I going to find a fake Jeep?"
