

STUDED vs FRICTION WINTER TIRES

Your choice of studded or friction winter tires depends on your needs. Both alternatives are wear-resistant and have superb driving qualities. By knowing their special characteristics, you can choose the type of tire that best matches your needs.

Snowy or icy roads?

If you drive more on icy roads than on snowy ones in winter, studded tires are the choice for you.

Wet ice and packed snow

If you have friction tires, you need to be particularly careful at crossroads etc. where there may be wet ice or hard-packed snow. Studded tires are superior to friction tires on wet ice and hard-packed snow.

Quiet tires

If you appreciate tires that are quiet on bare roads, friction tires are the right choice for you.

Tip of the Month

All Season Tires are not designed to be optimal in one specific weather condition. They are meant to be adequate in all weather conditions. To be able to handle different types of weather, compromises have to be made. The tread design of an all season tire is not as aggressive as that of a winter tire and is also not as flexible in the cold. An All Season tire's tread will quickly get packed with snow and lose traction.

Notice: Studded Tires Can Be Installed as Early as October 15th!

Winter Tires Are Here!

New Hankook i*cept and i*Pike Tires starting as low as \$129.99/tire

Winter Tires

starting as low as \$65.99/tire

Purchase 4 Winter Tires and 4 Winter Rims and SAVE \$40.00!
