

Get Your Car Ready To Spring Forward

1. Swap out your winter tires. Studded tires must be off by May 1st
2. While the tires are off, give the brakes a visual check
3. Clean up the interior – get rid of the winter's salt and mud
4. Get rid of musty odors by replacing your cabin air filter

Don't forget to set your clocks ahead 1 hour March 8th

Do You Suffer From Seasonal Allergies?

The cabin air filter is typically a pleated-paper filter that is placed in the outside-air intake for the vehicle's passenger compartment. Being a relatively recent addition to automobile equipment, this filter is often overlooked. Clogged or dirty cabin air filters can significantly reduce airflow from the cabin vents, as well as introduce allergens into the cabin air stream. Suffer from hay fever? When is the last time you had your cabin air filter changed?
